# CONTENTS

## METAL JIGS

Slow-Skip VB

スロースキップ VB

Excellent jig to use in weaker currents and lighter cross currents.

Slow-Skip CX

スロースキップ CX

Excellent for deep and strong currents.

Slow-Skip FB

スロースキップ FB

FB is a great all around-must have jig

Slow-Skip Freq

スロースキップ Freq

Developed specifically to induce bites when falling.

Slow-Skip Vib

スロースキップ Vib

Excellent jig for all SPJ techniques, Slow-Pitch, Long-Fall and Short-Pitch Jigging.

Slow-Skip Ovo

スロースキップ Ovo

Otherwise known as "THE EXPLORER". A very useful jig to check currents and seabed conditions.

スロースキップ Super-Rocket

High-Pitch Specialist

SPY

For anglers who enjoy High Pitch Jerking

SPY FIVE

A slow and High-Pitch performer. A good choice for rock fish.

SPY NARROW

Target powerful swimmers using light jerking technique.

SPYC COBRA

New to the SPY family this jig can also imitate a baitfish swimming away.

スピンドル SPINDLE

ECautious fish beware.

スピンドル NARROW SPINDLE NARROW

Safely release deep dwelling fish. Our jig to keep the future alive.

スロースキップ VB-Beta

This jig is a new concept model!

スロースキップ CX-Beta

This jig is a new concept model!

## Release JIG

Release Jig Spindle

A new proposition from Deepliner.

## RODS

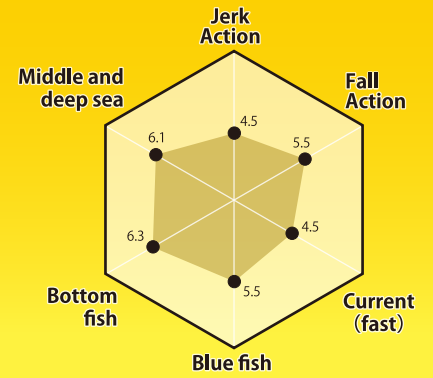

LOGICAL NATURAL MOVEMENT

Logical Rods draw out the optimal performance and control of the jigs with a natural feel.

MANIA FELLOWS NATURAL MOVEMENT

From sharp high-pitch jerking to slow-pitch ultra-heavy weight

Slow-Skip VB

**Excellent jig to use in weaker currents and lighter cross currents.**

### Characteristics

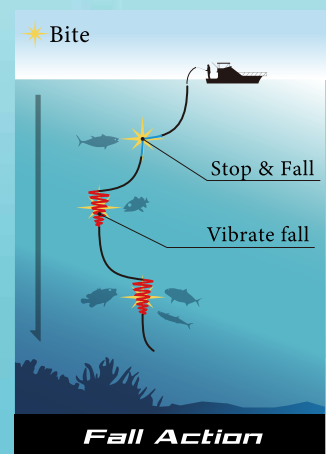

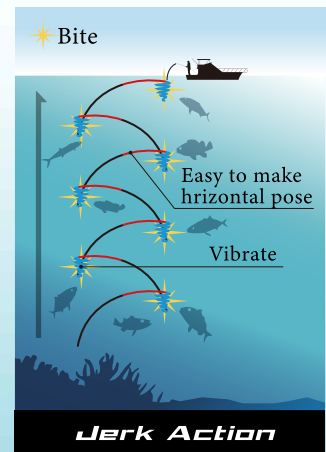

VB responds well to reeling from 1/8 to 1/1 handle turns while slow jerking. It flutters horizontally making it look like a stunned fish to induce bites. This model is in our Slow-Skip series and works best with Stop-Action..

### Weight Variation

Color : No.14 Green-Gold

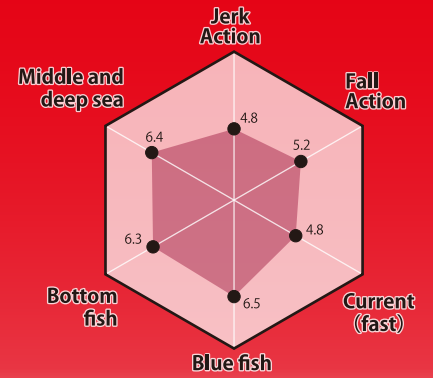

Movie

Slow-Skip CX

**Excellent for deep and strong currents.**

▲  
180g Actual size image  
Color : No.6 Iwashi

### Characteristics

With its slightly slenderer body it free-falls relatively faster than other jig models. It tends to lightly accelerate during falling and acts like its "leaping away" from fast predators while slow jerking. Ideal to target fast active fish in strong currents.

### Weight Variation

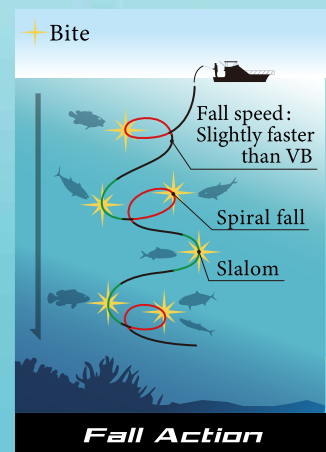

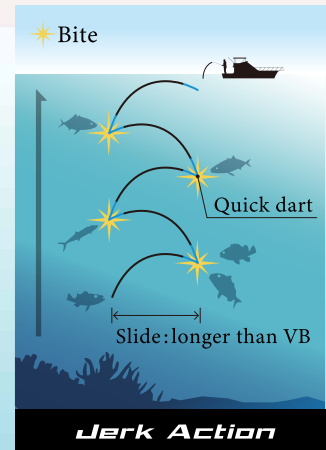

- 30g   ● 220g   ● 430g   ● 750g

CONVEX

Movie

Slow-Skip FB

**FB is a great all around-must have jig**

**Characteristics**

Good in cross currents, FB can be fished to represent a fast leaping baitfish from a bait-ball, or rhythmically to flutter like an injured baitfish. You cannot find a better option to test the conditions under water. We like to think of it as a must-have masterpiece.

**Weight Variation**

Movie

Slow-Skip Freq

**Developed specifically to induce bites when falling.**

**Characteristics**

Slow Skip Freq is best suited for Long Fall Jerking. Compared to our other jigs, it has a tighter, slower fall speed with a unique sway that vibrates as it falls to entice fish when other jigs will not.

Movie

## For anglers who enjoy High Pitch Jerking

### Characteristics

SPY is the first in the SPY family of jigs. It is a well-balanced jig with a slightly wider body than the other SPY models.

It performs wonders when using High-Pitch Jerking. It mimics bait fish darting away enticing predators to attack. SPY will also catch fish during free fall.

### Weight Variation

# A new proposition from Deepliner.

As responsible anglers, we should always strive to preserve and nurture the ocean we love. All the more reason we suggest the new methods of catch and release with our innovative Release Jig Spindle. It expands the possibilities of jiggling.

## Release Jig Spindle

Fish Releaser

Movie

<http://deepliner.com>

## Is it easy to use?

How to use the release jig is easy enough. Mount the release jig on the tip of the line, pierce the bighook inside the fish's mouth and just drop the fish in the water. Most people worry "How will know if the fish will survive? If you see the fish you are releasing moving a lot, or if it starts pulling the jig down, that is a sign it is recovering from the shock of being caught. At this moment, engage the reel clutch and gently raise the rod. It should release the hook to set the fish free.

### リリースジグの使用法

## What's type of fish can we release?

There is great potential for various species. One of the joys of off shore jiggling is encountering unexpected fish. But in reality, it is often the case you want to let the fish go because you caught an unintended prey or it was too small or too large to take home. On such occasions, if the fish is well enough to go back to the water you release the hook, and it shouldn't be a problem. But in the case of many of the deep-sea fish or rockfish, they become unable to withstand sudden pressure changes. The eyeballs and tripe pop out, most of them are not able to go back to their natural water depth if you release them. However, did you know that among the deep-sea fish they keep in aquariums, there are fish that are caught with the eyeballs and the tripe popped out as well? These fish were put in a high-pressure water tank to help them adjust themselves to a newer condition, taking a few weeks of training. If you can use this system at the time of catching, you can increase the survival rate dramatically.

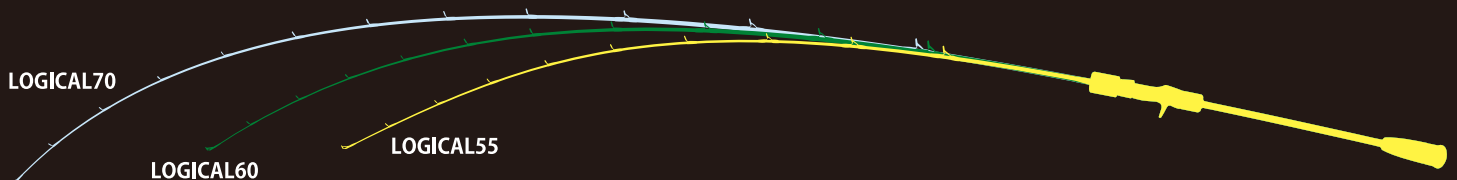

# LOGICAL NATURAL MOVEMENT

**Logical Rods draw out the optimal performance and control of the jigs with a natural feel.**

We have installed Fuji Torzite guides in high density for the purpose of “feeling” the undersea world and “commanding” the jig. Feel and control are critical factors when selecting your rods.

We have eliminated coatings on carbon blanks as much as possible. We use a hard single arbor for the arbor. After extensive consideration, we have adopted a 100mm EVA rear grip for the Butt End. By using three varying lengths, depend on the situation, the scope of the approach will increase dramatically, even at same location and using the same jig.

## #4 Bending curve (Load 0.5kg)

- More dynamically
- Response @falling action.
- Light tidal current

Length Choice  
for the situations.

- More delicate control.
- Response @Lift action.
- Heavy tidal current

“Simpler and easier”, enen for heavy weight Jigs.

# MANIA FELLOWS

## MANIA MOVEMENT

A collection to suit various situations and rhythms, form sharp high-pitch jerking to slow-pitch ultra-heavy weight.

It is a big advantage when the angler has enough rod power when you using a heavy weight jig, regardless of the size of the target, unexpected currents and greater depths. “Simpler and Easier” our theme never changes, even about heavy weights.
